

The Quality and Environmental Policy of Spec-tran is to determine, agree and conform to our client's needs and expectations whilst fulfilling the requirements of ISO 9001, 14001, statutory law and other compliance obligations. All of our transport services and activities are undertaken to current revisions of British Standards and industry codes of practice.

The company also recognises that the protection of the environment, the prevention of pollution and the reduction of waste is an important aspect of the Company's overall performance and is a major responsibility of Top Management.

The Company recognises that to be competitive and maintain good economic performance in the scope of the transportation of hazardous chemicals, waste products, machinery and bulk loads, we must continually improve the management system and the quality of our products and services which in turn increases the satisfaction of our clients, employees and other Interested Parties.

Key objectives of the Company are that the Management System provides: -

- A process to better understand the needs and expectations of our Interested Parties.
- Confidence to our management and staff that the requirements for quality and the environment are being fulfilled and maintained, and that continual improvements of our quality management system take place to enhance quality and environmental performance.
- A framework for establishing and reviewing quality and environmental objectives.

We are conscious that the motivation of our employees is dependent on their training and understanding of the tasks they are expected to perform. It is part of our on-going training programme that this policy is communicated and understood at appropriate levels within the company and to interested parties.

Quality of service and adherence to health, safety and environmental procedures are the responsibility of all employees of the company.

Signed: Ian Spencer Whitham

Position: Managing Director
